

Appendix H2 Parking Supply Memorandum

TECHNICAL MEMORANDUM

Date: November 29, 2012

To: Julian F. Capata – Atkins

From: Brian A. Marchetti, AICP

Subject: Review of Updated Parking Supply Information for LBUSD New High School #2 Project

KOA has reviewed supplemental information provided by Atkins on the Long Beach Unified School District (LBUSD) New High School #2 project. The project planned off-street parking supply has been updated from the previous 119-space number to a total of 132 spaces.

The final traffic impact analysis report produced by KOA and dated May 17, 2012 referenced a planned parking supply of 119 spaces and an estimated demand of 100 vehicles. Adverse parking impacts were not identified, and it was also discussed in the report that championship sporting events are not anticipated to be held at the campus. This would minimize the intensity of parking demand generated for sports-related special events.

The revised parking supply number, therefore, would improve upon the parking supply situation and does not create any new significant impacts. It also does not change the conclusions of the May 17, 2012 traffic impact analysis report.
